

# JUST THE **FACTS**

## **BHE RENEWABLES**

### TOTAL CONTRACT CAPACITY – OWNED AND UNDER CONSTRUCTION

	4,133 megawatts
Solar	1,534 megawatts
Wind	1,153 megawatts
Geothermal	338 megawatts
Hydro	138 megawatts
Natural Gas	970 megawatts

**RICHARD G. WEECH**  
President and CEO

BHE Renewables, based in Des Moines, Iowa, encompasses BHE Solar, BHE Wind, BHE Geothermal, BHE Hydro, and renewable project development and commercial management.

### PROVIDING CLEAN ENERGY SOLUTIONS

- BHE Renewables owns solar, wind, geothermal and hydro projects that produce energy for both the wholesale market and for customers under long-term power purchase agreements.

### SOLAR

- BHE Renewables owns 1,484 megawatts of solar-powered generation.
- Topaz Solar Farms is a 550-megawatt solar photovoltaic power plant in San Luis Obispo County, California.
- The 586-megawatt Solar Star development consists of two co-located projects in Kern and Los Angeles counties, California.
- BHE Renewables owns a 49 percent interest in the Agua Caliente solar farm in partnership with NRG Energy. The 290-megawatt solar photovoltaic power plant is located in Yuma County, Arizona.
- BHE Renewables is developing 96 megawatts of community solar garden projects in Minnesota across 28 individual projects.
- BHE Renewables acquired the Alamo 6 solar project in January 2017. The 110-megawatt project is located in Pecos County, Texas.
- BHE Renewables' acquisition of the 50-megawatt Pearl Solar project located in Pecos County, Texas, closed in August 2017.

> CONTINUED ON BACK

## WIND

- BHE Renewables owns 1,153 megawatts of wind-powered generation in operation.
- The 168-megawatt Pinyon Pines Wind I and 132-megawatt Pinyon Pines Wind II projects are located near Tehachapi, California.
- The 81-megawatt Bishop Hill II wind project is located in Henry County, Illinois.
- The 300-megawatt Jumbo Road wind project is located near Hereford, Texas.
- The 72-megawatt Marshall wind project is located in Marshall County, Kansas.
- The 400-megawatt Grande Prairie wind project is located in Holt County, Nebraska.
- Construction of the 212-megawatt Walnut Ridge wind project in Bureau County, Illinois, is expected to be completed in late 2018.

## GEOHERMAL

- BHE Renewables is a leader in the development and production of energy from geothermal and natural gas resources.
- Operating as CalEnergy, the company owns 10 geothermal facilities in California's Imperial Valley. The combined net capacity at Imperial Valley is 338 megawatts.
- BHE Renewables' natural gas-fueled plants include a 512-megawatt plant in Illinois, a 212-megawatt plant in Texas and a 50-megawatt plant in Arizona. The company also owns 196-megawatts of natural gas generation in New York.

## HYDROELECTRIC

- BHE Renewables' Wailuku hydroelectric facility, located in Hawaii, has the capacity to produce up to 10 megawatts of reliable, noncarbon energy.
- Through a build-operate-transfer arrangement with the Philippine government, BHE Renewables operates and maintains a hydroelectric power plant on the Philippine island of Luzon. The 150-megawatt Casecan Multipurpose Irrigation and Power Project is a combined hydroelectric and irrigation facility that diverts water from the Casecan and Taan rivers through a 16-mile-long tunnel to a hydroelectric generating plant. BHE Renewables owns an 85 percent interest in the project.
